SPECIALIZATION CERTIFICATE

4 Courses

IBM.

JavaScript Programming Essentials

Developing Front-End Apps with React

Developing Back-End Apps with Node.js and Express

Node.js & MongoDB: Developing Back-end Database Applications

May 30, 2024

Poppy Parker

has successfully completed the online, non-credit Specialization

JavaScript Programming with React, Node & MongoDB

Holders of this certificate showed their ability to build interactive front-end JavaScript applications using React components. They demonstrated competency with Node.js by writing back-end applications that communicate with other services via RESTful APIs using the Express framework. They've shown they can implement asynchronous programming, and callback functions that use promises and can connect their Node application with a MongoDB. They understand best practices such as optimization and scaling techniques.
